Bioidentical Hormone Replacement Therapy (BHRT)

BHRT uses plant-derived hormones that are chemically identical to those the body naturally produces. It is designed to restore hormonal balance and alleviate symptoms of perimenopause, menopause, and andropause.

■ Key Benefits

- Relieves symptoms of hormone imbalance such as hot flashes, fatigue, and mood swings.
- Supports healthy libido, energy, and mental clarity.
- Promotes bone density and cardiovascular health.
- Personalized to individual labs and goals.

■ How It Works

- Delivered via creams, injections, pellets, or capsules depending on patient preference.
- Restores hormones to optimal levels based on lab testing.
- Tailored protocols under licensed provider guidance.

■ Who It's For

- Women experiencing perimenopause or menopause.
- Men with symptoms of andropause or low hormones.
- Individuals seeking a natural, bioidentical approach to hormone balance.

■ The Profusions Difference

- Customized dosing based on individual lab panels.
- Uses bioidentical, plant-derived hormones.
- Comprehensive care model with clinical oversight.
