GHK-CU Peptide Therapy

GHK-CU is a copper-binding peptide with regenerative and anti-aging properties. It promotes collagen production, skin repair, and hair growth, making it a versatile peptide in aesthetics and wellness.

■ Key Benefits

- Stimulates collagen and elastin production.
- Improves wound healing and tissue repair.
- Supports hair regrowth and scalp health.
- Reduces wrinkles and improves skin elasticity.

■ How It Works

- Delivered via topical creams, serums, or injectable formulations.
- Works at the cellular level to promote repair and regeneration.
- Combines copper and peptide activity for enhanced effectiveness.

■ Who It's For

- Individuals seeking anti-aging or skin rejuvenation solutions.
- Patients with hair thinning or scalp concerns.
- Those recovering from injury or skin procedures.

■ The Profusions Difference

- Compounded peptide therapy tailored to patient needs.
- Clinical oversight ensures safe and effective use.
- Backed by regenerative and aesthetic research.
