NAD+ Therapy

■ What is NAD+?

NAD+ (Nicotinamide Adenine Dinucleotide) is a vital coenzyme found in every cell of the body. It plays a central role in energy production, cellular repair, and healthy aging. As we grow older, NAD+ levels naturally decline—leading to fatigue, slower metabolism, and reduced resilience. Profusions' NAD+ therapy helps restore optimal cellular function, supporting longevity, energy, and whole-body wellness.

■ Key Benefits

- **Boost Cellular Energy:** Supports mitochondrial function and ATP production.
- **Enhance Brain Health:** Improves mental clarity, focus, and memory.
- **Support Healthy Aging:** Promotes DNA repair and reduces oxidative stress.
- **Improve Metabolism:** Assists with weight management and blood sugar balance.
- **Strengthen Immunity:** Bolsters the body's natural defense and recovery.

■ How It Works

- Delivered through targeted infusion or injection therapy.
- Restores cellular NAD+ levels depleted by age, stress, or illness.
- Supports optimal function at the cellular level — powering energy, repair, and resilience.

■ Who It's For

- Individuals experiencing fatigue, brain fog, or low energy.
- Professionals and athletes seeking peak performance.
- Those interested in longevity and preventative health.
- Patients recovering from illness, surgery, or metabolic stress.

■ The Profusions Difference

- **Personalized Protocols** —tailored to your health goals and labs.
- **Trusted Pharmacies & Clinical Oversight** — ensuring safety and quality.
- **Virtual Access** — convenient telehealth consultations with licensed providers.
- **Education First** — empowering you to understand and optimize your care.
