

Profusions Health & Wellness

PT-141 Therapy

PT-141 (Bremelanotide) is a peptide designed to enhance sexual health and libido. Unlike other medications, it works on the nervous system rather than the vascular system, making it effective for both men and women.

■ Key Benefits

- Enhances sexual desire and arousal in men and women.
- Effective for erectile dysfunction and female sexual arousal disorder.
- Improves confidence and intimacy.
- Non-hormonal option for sexual wellness.

■ How It Works

- Administered via subcutaneous injection.
- Activates melanocortin receptors in the brain to stimulate arousal.
- Supports natural sexual function and responsiveness.

■ Who It's For

- Men with erectile dysfunction not responding to PDE5 inhibitors.
- Women with low libido or arousal disorder.
- Individuals seeking improved intimacy and sexual satisfaction.

■ The Profusions Difference

- Backed by clinical studies for safety and effectiveness.
- Personalized protocols with clinical oversight.
- Discreet and convenient virtual care process.
