Retinoic Acid Therapy

Retinoic Acid (Tretinoin) is a prescription-strength vitamin A derivative used in skincare to promote cell turnover, reduce wrinkles, and improve skin clarity. It is one of the most clinically studied compounds for anti-aging and acne treatment.

■ Key Benefits

- Reduces fine lines and wrinkles.
- Improves skin texture and clarity.
- Supports acne treatment and prevention.
- Stimulates collagen production for youthful skin.

■ How It Works

- Applied topically as a cream or gel.
- Encourages faster skin cell turnover.
- Targets pigmentation, acne, and visible aging signs.

■ Who It's For

- Adults seeking anti-aging skincare solutions.
- Patients with acne-prone or sun-damaged skin.
- Individuals looking for clinically proven skin renewal.

■ The Profusions Difference

- Prescription-strength formulation under physician guidance.
- Clinically validated for acne and anti-aging care.
- Compounded options available for sensitive skin.
